

How to create a presentation in XML with XSL

Dominik Vasko
2019-04-11

What you need to get started

- * Saxon, a xslt processor
- * FOP, a xml:fo processor
- * Stylesheets, for your xslt transformation
- * XML, XSL editor, you can also use VIM, Emacs

What you need to get started

- * Saxon, a xslt processor
